

LIFE RUNS ON ENERGY®

# Energy Efficiency Pays

Schedule a **FREE Home Energy Audit** and let one of our energy analysts help you discover ways to use energy wisely so you can get the most for your energy dollar. To help you start saving immediately, Tampa Electric will make a free pack of eight energy-efficient fluorescent light bulbs available to you when you participate.

Tampa Electric also offers a **Comprehensive Home Energy Audit** for \$15. In addition to receiving the measures included in our Home Energy Audit, our analyst will perform an on-site Building Energy-Efficiency Rating System (BERS) test to rate your home's energy efficiency. The cost for the BERS test starts at \$239 for a Class I rating, \$160 for a Class II rating and \$95 for a Class III rating (Class III is available for new construction only).

# Energy Efficiency Really Pays

## Our Energy Analysts will ...

- Check your attic for proper insulation. You may qualify for a ceiling insulation certificate through Tampa Electric's Ceiling Insulation program that can be used to purchase additional insulation.
- Check your air conditioning ductwork for leaks. You may qualify for our Ductwork program, where we'll seal your existing ductwork to stop the leaks and minimize future problems. A fee applies.
- Check windows and doors for proper caulking and weatherstripping.
- Check your hot water temperature and advise you of appropriate settings.
- Give you wise energy tips that match your lifestyle.

In addition, Tampa Electric's Heating and Cooling program enables you to earn rebates for replacing your old, inefficient air conditioning system with a new, energy-efficient heat pump that meets our energy-saving standards. This program is available to all residential customers.

To find out more about how these energy-efficient programs can pay off for you, visit
