Net Meter - Sample Bill

If your home or business has a net meter, you will see an additional line item on your statement called "In Flat kWh".

- **In Flat kWh** - the amount of electricity your renewable generating system delivered to Tampa Electric's grid. This sample bill shows 207 kilowatt-hours were delivered over a 30-day period.

The In Flat kWh reading will cause the following two line items to adjust:

- **Diff.** (Difference) – the total amount of electricity in kilowatt-hours your home or business consumed. This sample bill shows 1185 kWh.
- **Total kWh Purchased** – the amount of electricity billed. This sample shows 978 kWh were billed over a 30-day period. This is the difference between the amount you consumed and the amount you sent back to the grid ($1185 - 207 = 978$ kWh).

Please note: The total amount of electricity produced by your renewable generating system is not tracked by the net meter and is not displayed on your bill.
